Languages: JavaScript, HTML, CSS.

Frameworks: React, Bootstrap, NEXT.js, Tailwind CSS

Databases: Supabase

Tools: , GIT, GitHub, GitLab.

WORK EXPERIENCE

Front-end Web Developer — January 2024 to Present

As a freelance Front-end Web Developer, I specialize in building modern, responsive, and user-friendly websites that help businesses and individuals establish a strong online presence.

- Developed responsive websites and web interfaces using HTML, CSS, JavaScript, React, and Tailwind CSS, and Next.js, focusing on usability, performance, and maintainable code.
- Translated UI designs into functional web experiences, creating clean layouts, reusable components, and consistent styling across different screen sizes.
- Built interactive web applications with dynamic features and API integrations, delivering engaging experiences tailored to project requirements.
- Optimized website usability and responsiveness, refining layouts, interactions, and visual consistency to provide a smooth experience across devices.
- Collaborated with clients and other developers and designers to understand project requirements, implement feedback, solve problems, and deliver solutions aligned with their goals.
